

Premium PP Non Woven Stack Solutions

Engineered for Integrity.

*Global Export Standards: ISO 21898
Specialized UN-Certified FIBC Bags*

Quality in Every Thread

Our Commitment to Zero-Defect Logistics

At *Fateh Big Vision Exporter*, we operate under a "Quality First, Shipment Second" philosophy. We recognize that in the global supply chain, a single bag failure can lead to significant operational downtime.

To mitigate this, we enforce a strict
Four-Tier Verification Process:

1

Fabric Strength Verification:
We independently test the fabric's Tensile Strength and GSM using calibrated technical equipment before production begins.

2

On-Site Production Audit:
We perform physical spot-checks during manufacturing to verify stitching patterns, loop reinforcement, and printing accuracy.

3

Third-Party Certified Testing:
For complex orders, we coordinate testing through NABL-accredited labs to provide an authentic Certificate of Analysis (COA) & other testing reports to ensure to meet ISO 21898 standards, ensuring the promised Safety Factor (5:1/6:1) is physically verified.

4

Pre-Shipment Loading Inspection: We supervise the final packing and container loading to ensure moisture control and damage-free transit.

We don't just supply packaging; we provide the peace of mind that your cargo is secure.
