

# Premium PP Woven Stack Solutions:

Engineered for Integrity.

*Global Export Standards: ISO 21898  
Specialized UN-Certified FIBC Bags*

Quality in Every Thread

# Our Commitment to Zero-Defect Logistics

At *Fateh Big Vision Exporter*, we operate under a "Quality First, Shipment Second" philosophy. We recognize that in the global supply chain, a single bag failure can lead to significant operational downtime.

To mitigate this, we enforce a strict  
**Four-Tier Verification Process:**

1

**Fabric Strength Verification:**  
We independently test the fabric's Tensile Strength and GSM using calibrated technical equipment before production begins.

2

**On-Site Production Audit:**  
We perform physical spot-checks during manufacturing to verify stitching patterns, loop reinforcement, and printing accuracy.

3

**Third-Party Certified Testing:**  
For complex orders, we coordinate testing through NABL-accredited labs to provide an authentic Certificate of Analysis (COA) & other testing reports to ensure to meet ISO 21898 standards, ensuring the promised Safety Factor (5:1/6:1) is physically verified.

4

**Pre-Shipment Loading Inspection:** We supervise the final packing and container loading to ensure moisture control and damage-free transit.

*We don't just supply packaging; we provide the peace of mind that your cargo is secure.*

# Technical Specifications:

UV Protection: 200 to 1600 hours

Denier (thickness of woven polypropylene strands): 600 above

Fabric Mesh: 4 x 4 to 16 x 16

Width: 25 cm to 125 cm 10" – 47"

Lamination: 12" – 33"

BOPP film Micron: 10,12,15,18,21 Above

Length: **As specified by the customer**

Colours: **As specified by the customer**

Capacity: **As specified by the customer**

Printing: **Up to 8 colours on one or both sides with corona treatment.**

# Types of BOPP Laminated PP Bags:

**BOPP Laminated PP Woven Bags – Single Side.**  
(Only one side Printed BOPP and / or other side Flexographic Printing)

**BOPP Laminated PP Woven Bags – Both Sides.** (Both Side Printed BOPP)

**BOPP Laminated PP Woven Bags with Gussets.**  
(Centre Gusset or Off-Centre Gusset)

**BOPP Laminated PP Woven Bags with Liner.**  
(Inside liner – loose or bottom stitched)

**BOPP Laminated PP Woven Bags with Perforations.**  
(Perforation on the Sides for aeration)

**BOPP Laminated PP Woven Bags with Handles and D-cuts.** (For easy lifting and mobility)

**BOPP Laminated PP Woven Bags with Top Hemming,**  
(Allows opening easily)

**BOPP Laminated PP Woven Valve Bags.**  
(Facility for online Packing)

**BOPP Laminated PP Woven Bags with Window,**  
(Transparent window either on the sides or front / back for visibility of inside packed product)

# Market applications utilizing BOPP woven polypropylene bags include:

**FOOD PRODUCTS**

**PET FOOD**

**FERTILIZER**

**CHEMICALS**

**ANIMAL FEED**

**CAT LITTER**

**RESINS**

**BUILDING MATERIALS**

# Printing of the Bags:

*We use Rotogravures reverse printing technology to do printing in the BOPP films. Our machines have the capacity to do printing up to 8 colours on the single Bag, through our well qualified technical and graphical department, we make the customized design which matches the customer products. And once the design is finalized, it goes for the engraving of cylinder as per the design, thereafter the process of printing can be done.*

## Technical details of Cylinder:

Cylinders are very important for printing, and for each colour, separate cylinders are engraved; all together prints attractive and beautiful bags. Normally, the cylinder expenses must be borne by the customer, and it remains always the customer's property.

There are **two types** of Cylinder Engraving, viz.

**ELECTRONIC ENGRAVING** and **CHEMICAL ENGRAVING**.

Normally, customer prefer chemical engraving as it is cost effective; but for very sharp printing quality, electronic engraving is preferred and it is costlier. We do suggest our customers as to which cylinder would be suitable for them as per the design.
